

DnA Project Phase 3 – Team 41

Relational Model:

First Normal Form (1NF): Owing to the fact that all relations have already been modified to not have multivalued or composite attributes (or their combinations), the relational model is already in its first normal form.

Second Normal Form (2NF)

Station_name and Station_Code foreign keys of the entity TRAVEL have been expanded to Arrival_Station_name, Arrival_Station_Code, Departure_Station_name, and Departure_Station_Code for better semantics.

Third Normal Form (3NF)
